

# SunDial Powder Coatings

## 7 Stage Washer – What it means to You!

At SunDial we know that you can never get a great powder coating job completed if the product surface isn't cleaned and prepared to the highest technical standards prior to powder coating. As we like to say, and please pardon our English... "If it ain't clean... it won't cling!"

That's the reason we have invested in a state-of-the-art – 7 Stage Washer System. We looked at it as a "bottom line" issue... your bottom line!

In a nutshell here's how you will benefit:

1. Your finished products will ultimately end up at a higher level of quality and have a more esthetically pleasing appeal because the powder coating process is applied evenly and consistently
2. Your finished products will have greater durability because the powder coating process bonds in a superior manner preventing possible flaking, bubbling and minimizes the opportunity for corrosion
3. You will achieve a higher level of customer satisfaction due to product appearance and greater reliability of the surface finish
4. Your customers will be happier because they know they receive high quality products your company
5. You will have increased confidence in knowing that your products are the best
6. Your company's reputation will improve because you produce a superior product
7. Your bottom line increases as a result of increased sales and fewer customer problems to worry about and handle
